

Fin-Gro
Financial Growth System

Document Version: **v0.1**

Status: **Draft**

Date: **2026-09-01**

1. PROJECT IDENTIFICATION

Project: **Fin-Gro**

Project Type: **Software Application / Financial Growth System**

Project Version Documented: **v1.0.2**

Reference Tag: **v1.0.2**

Development Status: **Development**

Author / Rights Holder: **V. S. Ceres**

Copyright: © **2026 V. S. Ceres**

2. PURPOSE

This document records the authorship and intellectual-property status of the **Fin-Gro** project and establishes a documentary reference to the project state identified as **v1.0.2**.

It forms part of the continuing development and intellectual-property documentation of the project.

3. HISTORICAL VERSION REFERENCE

The Git tag **v1.0.2** identifies a historical development checkpoint of the **Fin-Gro** project.

Reference Commit:

02da5ab600673414a2dac392500628a28be7cfba

Commit: Update style.css

Commit Date: 2026-08-23 18:08:26 +0300

The historical v1.0.2 checkpoint is preserved as established in the Git repository.

4. RELATIONSHIP TO v1.0.2

This notice is added to the repository after the establishment of the **v1.0.2** historical checkpoint.

Accordingly:

- the **v1.0.2** tag is not modified;
- the contents of the **v1.0.2** checkpoint are not retroactively changed;
- this document is recorded by a subsequent Git commit;
- the Git history establishes the chronological relationship between the project version and this documentation.

This distinction is maintained to preserve the integrity and traceability of the project's development history.

5. AUTHORSHIP

The **Fin-Gro** project includes original concepts, source code, application logic, interface concepts, documentation, calculations, methods, workflows, and other original materials developed as part of the project.

The authorship and rights associated with such original project materials are attributed to:

V. S. Ceres

Unless otherwise expressly identified, original materials created for **Fin-Gro** form part of the project's intellectual-property record.

6. INTELLECTUAL PROPERTY

The project may contain multiple forms of intellectual property, including but not limited to:

- source code;
- application architecture;
- original algorithms and calculation models;
- user-interface and interaction concepts;
- visual design elements;
- documentation;
- original methods and workflows;
- project naming and identity;
- other original creative or technical materials.

The legal protection applicable to individual elements depends on the nature of the work and the applicable intellectual-property framework.

7. REPOSITORY RECORD

Development Repository:

fin-gro-v1.0-dev

The Git repository provides a chronological development record containing commits, branches, tags, documentation, and other project materials.

The repository history should be maintained so that significant development stages remain identifiable and traceable.

8. FUTURE DEVELOPMENT AND VERSIONING

Future modifications, improvements, additions, or architectural changes to **Fin-Gro** should be recorded through the project's version-control history.

Where appropriate, significant changes should receive:

- a dedicated Git commit;
- updated documentation;
- a new version identifier;
- a new tag or release designation.

Historical versions should not be modified retroactively merely to incorporate later developments.

9. DEVELOPMENT AND RELEASE CLASSIFICATION

DEVELOPMENT

The project is actively being developed and may contain incomplete, experimental, or changing functionality.

PRE-RELEASE

The project has reached a distributable or testable release stage but has not yet been designated as a final release.

FINAL RELEASE

The project has been formally designated as a completed and stable release.

These classifications describe the project lifecycle and are distinct from Git branch names.

10. RIGHTS NOTICE

© 2026 V. S. Ceres. All rights reserved.

No part of the **Fin-Gro** project should be assumed to be released into the public domain or licensed for unrestricted use solely because the project or parts of its source code may be accessible through a repository.

Any permitted use, reproduction, modification, distribution, or commercial exploitation is subject to the applicable license or explicit authorization of the rights holder.

11. LEGAL FRAMEWORK

This document is an authorship and intellectual-property notice and project record.

It does not by itself constitute a complete legal registration, license, assignment, contract, or substitute for formal intellectual-property protection where such protection or registration is available.

Applicable national and international intellectual-property laws and treaties may apply to the relevant project materials.

Where formal legal protection or registration is required, appropriate procedures should be considered separately.

12. DOCUMENT RECORD

Document: **LAW-IPN-001**

Version: **v0.1**

Status: **Draft**

Project: **Fin-Gro**

Project Version Documented: **v1.0.2**

Reference Tag: **v1.0.2**

Author / Rights Holder: **V. S. Ceres**

Date: **2026-09-01**

13. HISTORICAL INTEGRITY STATEMENT

This document was added after the creation of the **v1.0.2** historical checkpoint.

The addition of this document does not alter, replace, or amend the **v1.0.2** tag or the commit identified as its reference point.

The subsequent Git commit containing this notice represents a new point in the development history of **Fin-Gro**.
